COVER 3s s.r.o. company profile

Cover3s is an ISO 9001 certified manufacturing company where sustainability meets innovation in the world of packaging. We have been operating in the market since 1995, consistently prioritizing maximum quality, responsibility, reliability, customer satisfaction, and strong relationships with our clients and partners. Since 2024, the company has been part of the **TK Investments Group**.

We specialize in the **development and production** of packaging and transport materials made of corrugated and solid board, which are high-quality and reliable products for transporting goods of various kinds.

The company's headquarters and production facility are located in the village of Kamanová, from where we can efficiently serve industrial areas such as Bratislava, Nitra, Levice, Žilina, Martin, and their surroundings with our own logistics and minimal transportation costs. However, we are also capable of delivering our products to central and eastern Slovakia, as well as abroad.

TK Investments group

TK Investments Group is a dynamic industrial holding company overseeing **ADO-Service**, **AAH Plastics**, and **Cover3S**, each specializing in distinct areas of industrial production. Leveraging synergies across its subsidiaries, the group optimizes **supply chains and internal cooperation**, particularly in the procurement and utilization of **packaging materials** for manufacturing processes.

ADO-Service, s. r. o. was established in 2004 with a focus on sawn and structural timber production and trade.

Timber Processing

•Types of wood processed:

- Coniferous: Spruce, fir, pine
- Deciduous: Oak, beech

Main Products & Applications

- Structural timber for trusses
- Construction timber
- Industrial timber - for packaging and logistics
- Semi-finished products -For parquet manufacturers

AAH Plastics s.r.o. is a producer of **injection-molded plastic parts** for automotive industry, established in 2015, based in Solčany with 240 employees.

We support major international automotive companies as a trusted **TIER 1 & TIER 2 supplier for OEM as Land Rover, OPEL, BMW, VW.**

With cutting-edge injection molding technology from **ENGEL and ARBURG**, AAH Plastics delivers **high-quality, precision-engineered plastic parts** for the **interiors and exteriors** of the most luxurious automobiles, as well as **technical components for specialized applications** such as vision systems and air conditioning systems.

Company product portfolio

Cardboard packaging and other packaging materials

- Custom-made packaging solutions from corrugated board according to FEFCO standards
- From concept to production to meet the specific requirements of our customers
- We create packaging that not only protects your products but also reflects your brand identity

If you are looking for **strength, practicality, and cost-effective packaging material**, our **cardboard boxes** are the ideal choice for you.

Our portfolio also includes **packaging materials such as bubble wrap, stretch film, adhesive tapes, and protective corners.**

Development of product

Our development takes place in the following four phases:

1. Customer visit

We actively participate in packaging development and communicate customer needs. Our top priority is understanding the client's requirements

2. Information gathering

Fixation, size, material type, strength, colors, paper type, and selection of additional properties based on the specific needs of the customer.

3. 3D proposal

Specialized software allows us to process 3D product data and develop the most comprehensive solutions for your packaging and its fillings

4. Final approval

After approval, the production of printing plates and die-cutting forms follows.

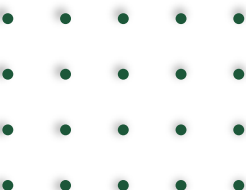

Production

- Thanks to EU projects, we have access to the most advanced technologies in the field of carton packaging production.
- Based on individual customer requirements, we can manufacture boxes, grids, fixations, and inserts of various sizes and shapes

MATERIALS

- Corrugated board is a packaging material with unlimited possibilities. It is classified as a lightweight yet strong material.
- Thanks to its versatility, we can adapt it to various requirements for modern packaging.
- Plastic cardboard is a durable and stable material with a long lifespan.
- Resistant to moisture, frost, steam, mold, and contamination by chemicals, Extruded PP - 100% recyclable.

- We process cardboard from renowned global manufacturers, ranging from smooth board and standard 3-ply to the strongest 7-ply cardboard.
- Our production is adapted for both large-scale and small-scale manufacturing, as well as for the production of large-format boxes and smaller processed cardboard formats.

Technology – machines and equipment

Die-cutting and Box Production Capabilities

•Die-cutting for shaped cartons, grids, and inserts:

- Three platen presses
- Fully automated COBRA machine
- Customer-specific forms handled with precision

•Additional die-cutting and box printing machines:

- BOXMATIC
- KIRBIS 2000 FPS

•Finalization of carton box production:

- **Large-format gluer-stitcher** for medium and large cartons (5-ply and 7-ply corrugated board)
- **Automatic gluer** for small and medium-sized cartons (3-ply and 5-ply corrugated board)
- Supports **single and multi-point bonding** capabilities

Machines for high-capacity production

We use an Inline fully automated production line

- Width: 350-2200mm
- Length: 600-4500mm
- High-quality printing with 1 to 4 colors
- Possibility of die-cutting with slotting knives, die-cutting forms, or a combination of both
- Automated palletizing units

Production Machines

	Print	Die-cutting	Die-cutting form	Gluing	Stitching	Capacity *
BOXMATIC 3-PLY, 5-PLY, 7-PLY	max. 500x1000	max. 2300x5300 min. 300x600	max. 230x1500	x	x	300-600pcs/hr.
INLINE T-GC1228 3-PLY, 5-PLY	4 Colours max. 1200x2760	max. 1200x2800 min. 365x600	max. 1160x2760	1-Point gluing max. 1200x2800 min. 300x710	x	1500-12000pcs/hr.
JUMBO T-BP2245 3-PLY, 5-PLY, 7-PLY	2 Colours max. 2200x4450	max. 2200x4500 min. 500x700	max. 2150x4450	x	x	300-5000pcs/hr.
COBRA 3-PLY, 5-PLY	x	x	max. 1620x1200 min. 450x650	x	x	max.3200pcs/hr.
Platen Presses						max. 1200pcs/hr.
1.	x	x	max. 710x1025	x	x	
2.	x	x	max. 880x1210	x	x	
3.	x	x	max. 1080x1860	x	x	
KIRBY FPS2000 3-PLY, 5-PLY	1 Colours max. 600x2000	max. 1100x2000 min. 220x200	x	x	x	max. 1800pcs/hr.
Gluing machine HD2300 3-PLY, 5-PLY	x	x	x	max. 4- Point gluing max. 1600x2300 min. 120x550	x	1500-12000pcs/hr.
Bizzozero XC32	x	x	x	x	max. 2300x3600	300-500 pcs/hr.

* The machine capacity depends on the material quality, box size and complexity.

We currently process **550,000m²** of corrugated cardboard per month. After the completion of the electrical infrastructure, we will be able to increase capacity up to **1 000 000m²**.

Financial Parameters

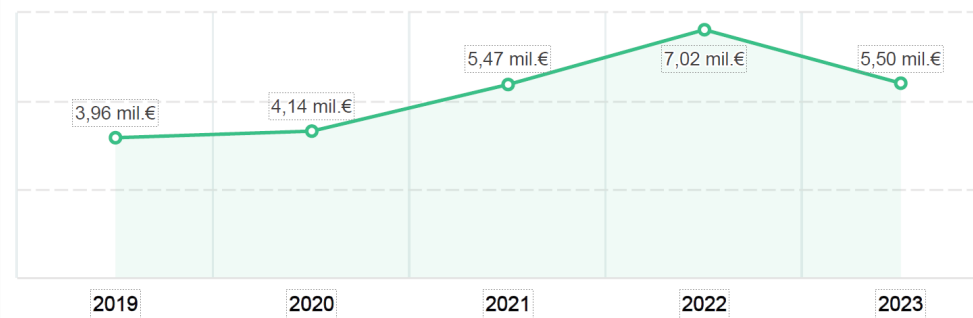

Over the past five years, our company has achieved significant progress across all key financial indicators:

- Increased our revenue by nearly 80% to €7 million
- Achieved a record profit of €0.9 million in 2022
- EBITDA in the year 2022 reached €1.2 million, more than doubling compared to the previous year
- Operating margin maintains an acceptable level of 30%

Thanks to stable financial performance, we continue to invest in cutting-edge technologies to further enhance our operations and maintain our competitive edge.

Storage & Shipping

1. Warehouses

Storage and shipping of cardboard packaging are an integral part of ensuring efficient and reliable delivery for us.

2. Organization

Our large storage facilities enable organized and efficient warehousing, allow inventory tracking, and ensure products are maintained in optimal condition.

3. Collaboration

We collaborate with our customers to establish storage and agreements that accommodate their specific needs and preferences.

4. In-house Transportation

A higher level of flexibility and accuracy in order deliveries. Timely deliveries with precise scheduling or express delivery options.

Our production facility

By installing photovoltaic modules, COVER 3s signals its responsible actions in relation to the environment and actively contributes to climate protection by significantly reducing CO2 emissions. With continuously rising energy costs, photovoltaic equipment contributes to cost savings and additionally to reducing dependence on energy suppliers.

Pallets

Pallet solution

We can provide suitable, high quality, and efficient pallet solutions for your products. With our extensive network of verified manufacturers and partners, we offer a wide range of pallets tailored to your exact specifications and requirements. In addition to standard EURO pallet solutions, we also offer pallets in custom dimensions.

We maintain partnerships

Continens s.r.o. as a manufacturer of eco-friendly pallets and distributor of packaging materials, is one of our largest clients. Through close collaboration, we have also gained a reliable partner in marketing and commercial representation.
